

Ozone Laundry Program

The use of ozone technology allows for a significant reduction in energy, water and chemical use in commercial laundry facilities. Ozone represents an excellent opportunity to decrease utility costs, increase operational efficiency, and improve the life and quality of linens through environmentally aware antimicrobial practices.

DEL Ozone, recognized as a leading authority in ozone technology worldwide since 1975, offers a turn-key ozone program that will elevate the way you do laundry, providing a proven return on investment.
