FEEDING

EDGE SERIES

EDGE TRI-MAXX

THREE-INPUT HIGH
PRODUCTION
SPREADER FEEDER

HOW IT WORKS

Edge Tri-Maxx is a three-station high output cornerless spreader/feeder for the very highest throughput and individual production tracking by operator. Comfortable, yet space efficient, lateral separation of the feed targets reduces operator twisting for an ergonomic, fast, and efficient feed. Using the fewest possible number of internal linen transfers and less moving parts, a wide variety of sheets can be ironed end-to-end faster than ever before. Tri-Maxx has a standard 120" (3050 mm) usable width as well as an optional 136" (3500 mm) width.

★ KEY CHICAGO® ADVANTAGES

Truly High Speed Production

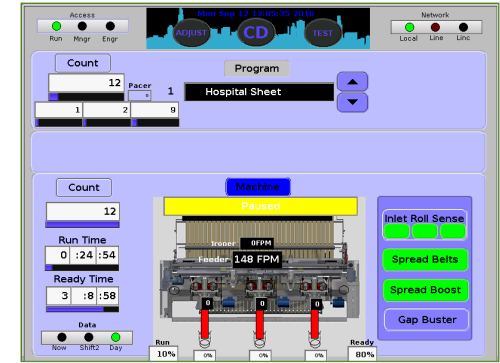

Tri-Maxx is designed so three operators can produce as much linen every hour as the fastest available four station feeder. Independent continuously running feeding inputs allow any of the three stations to be capable of stand-alone theoretical operation of up to 900 pieces per hour, and eliminates machine speed limitations at the input side with a cycle time of approximately 2 seconds.

High Speed Servo Motor

Improved simplicity and performance is now achieved by a newly redesigned servo-powered corner finding mechanism. This new design provides longer-term repeatability, quieter operation, and more up-time, all while reducing the amount of components for easier maintenance and repair.

☞ CHI•TOUCH

CHI•Touch is the most advanced PC-based touchscreen control on the market. It is an intuitive, easy-to-learn interface that's effortlessly customizable to your needs. It gives you enhanced control over your Chicago equipment and is flexible enough to record, store, and export virtually any production parameter you want to monitor.

Individual Operator Accountability

Not only is CHI•Touch standard on Tri-Maxx, but three individual counter screens are also located above each feeding station to display accurate, real-time production numbers and pace for each operator.

Building on our industry-leading 130 years of experience, we continuously evolve and innovate to meet the changing needs of our customers—that is the Chicago Advantage!
