TUFR TENSIONING UTILITY FORM FINISHER WITH ROTATING FORM

Model TUFR

The TUFR produces top quality garments and is easy to operate. It features a One Touch control panel that makes it easy to choose from 9 available programs. Each program applies the correct amount of tension, steam and hot air to the garment for a high quality finish. This makes it simple to process a wide variety

of dry cleaned or wet cleaned garments. A rotating form allows the operator to position the rear clamps and use when required. The TUFR is equipped with a microprocessor with self-diagnostics and is built to exacting standards to provide years of trouble free service.
