

FLIPPER CT

SMALL PIECE FLAT STACKER/
FOLDER-STACKER

HOW IT WORKS

Flipper CT is a simple, high-speed, half folder/stacker with built-in discharge conveyor and a feed table featuring auto-bypass. It is designed to automate the folding and stacking process of small tumble dried pieces for consistent and high production of up to 2000 pieces per hour. Smaller items are stacked in pre-set heights while larger pieces are half folded prior to counting and stacked. Completed stacks are automatically discharged to the integrated delivery conveyor for manual removal, or advanced directly onto a master conveyor.

CHICAGO

MODEL

		MAXIMUM LENGTH	
		STACKING	FOLDING
FLIPPER	Wash Cloths, Wiper Cloths, Shop Towels, Bar Wipes	12" (300 mm)	24" (600 mm)

Optional Discharge Conveyor Feature

Return-to-operator conveyor with rugged updated transfer guides

KEY CHICAGO® ADVANTAGES

Consistent, Automated Production

Flipper CT increases operator output by eliminating manual counting of items, making production and counts more consistent per operator hour, reducing fatigue, and creating uniform automatically counted bundles of items for efficient storing and packing.

CHI•TOUCH

CHI•Touch is the most advanced PC-based touchscreen control on the market. It is an intuitive, easy-to-learn interface that's effortlessly customizable to your needs. It gives you enhanced control over your Chicago equipment and is flexible enough to record, store, and export virtually any production parameter you want to monitor.

Enhanced Flexible Control

Individual item types are programmed for choice of flat stacking or folding, stack height, and specific count. New powerful software updates allow for more flexible control in programming—including fold timing, flip timing (delay), exit conveyor runtime, and air pulse duration to suit a wide variety of item types.

Building on our industry-leading 130 years of experience, we continuously evolve and innovate to meet the changing needs of our customers—that is the Chicago Advantage!
