MAXIMUM ENERGY EFFICIENCY. SERIOUS RESULTS.

UNIMAC.COM

UT & UTT SERIES 30-75 LB PREMIUM TUMBLE DRYERS
Proudly based in Ripon, Wisconsin, USA, UniMac is dedicated to research, development and testing to provide equipment that delivers industrial strength and long-lasting quality. Our products undergo a 5-stage product-development process and are pushed beyond their limits in our state-of-the-art test lab to ensure they exceed the toughest demands of the commercial environment and meet our customers’ highest standards.

**MAXIMUM PERFORMANCE WITH MORE CONTROL**

Quality results are the goal of your on-premises laundry. However, you also want advanced functionality and access to the data that enables you to better manage your resources. UniMac® Premium tumble dryers deliver exceptional performance along with our legendary durability, while offering complete control of the operation.

**LOWER YOUR COSTS WITH UNIMAC**

Drying cycles are usually 30 percent longer than wash cycles. Reducing dry times to match wash times enables you to run your laundry at maximum efficiency. Our dryers are designed for fast drying, while balancing energy costs. With more than 70 years of dryer engineering experience, we have found the perfect balance between drying time and actual Btu usage to conserve energy, maximize throughput and lower labor costs.

**OPTidry**

**OVER-DRY PREVENTION TECHNOLOGY**
UniMac’s optional OPTidry system takes efficiency further by eliminating costly over-drying. Removing over-drying from your laundry not only reduces utility expenses, but also curbs labor costs and extends linen life, saving up to thousands of dollars annually.

**INDUSTRY-LEADING DURABILITY**
When it comes to your machine lasting longer and looking good, the difference is in the details. And that’s where UniMac shines. Our tumble dryers incorporate a durable cart bumper and kick plate to protect dryer fronts from scratches and dents incurred during the laundering process. Constructed of high-grade steel, our heavy-duty door and two-point hinges will stand up to the toughest laundry conditions.

**LABOR: 45-50%**

**Equipment: 8-12%**

**Linen Replacement: 13-25%**

**Chemicals: 8-12%**

**Utilities: 8-12%**

**Maintenance: 3%**

Proudly based in Ripon, Wisconsin, USA, UniMac is dedicated to research, development and testing to provide equipment that delivers industrial strength and long-lasting quality. Our products undergo a 5-stage product-development process and are pushed beyond their limits in our state-of-the-art test lab to ensure they exceed the toughest demands of the commercial environment and meet our customers’ highest standards.
**MORE CONTROL OPTIONS**

**UniLinc**

The industry-exclusive UniLinc system from UniMac® represents the pinnacle of laundry management.

1. **FLEXIBLE OPERATION** UniLinc allows any combination up to 48 auto-dry, moisture-dry and time-dry cycles to be customized using real words instead of codes.

2. **EASY TO USE** Get started with the push of just two buttons.

3. **MONITOR YOUR LAUNDRY** Record start, stop and idle time between cycles to track the efficiency of your labor.

4. **REDUCE DOWNTIME** Receive automatic reminders of daily, weekly and monthly maintenance schedules, while machine errors are recorded by date and time for quick diagnosis and repair.

35-pound capacity model also offered with M-Series control.

---

**MORE VISIBILITY OF YOUR OPERATION**

When UniLinc-controlled tumble dryers and UniLinc washer-extractors are networked with the TotalVue system, your operation gains the pinnacle of management.

Unmatched visibility to the entire operation equips managers with all the dashboards and data to better manage their on-premises laundry.

---

**C.A.R.E.™**

In the unlikely event of a linen fire within the cylinder, our optional Combustion Automated Response Equipped (C.A.R.E.) system, a multiport water manifold system, will saturate the linens in the cylinder. It can also activate an alarm at a remote location.

---

**PEACE OF MIND**

UniMac offers a limited warranty for any part of the commercial dryer which fails as a result of a defect in materials or workmanship during the first three years (36 months) after the date of original installation.*

*Parts only, labor not included. See UniMac Warranty Bond for specifics.
