

O.P.L.TM Feeder

(One Person Loading)

ULTRA COMPACT FEEDER

Built-in spreader/feeder with small piece bypass

Now there is a compact, fast and ergonomically correct built-in spreader/feeder that lives up to the Chicago name for serious flatwork finishers. One that keeps up with the speed and power of Chicago's Tri-Star Ironer/Folder Series, as well as Chicago's complete line of mid-range and Imperial Ironers.

O.P.L. is the first built-in compact feeder designed for the larger sheets and production quantity demands of today's labor, efficiency and quality-conscious market.

O.P.L. Feeding (One Person Loading)

Dimensions and Utilities

NOTE:

1. Specifications subject to change without notice. Consult factory for certified construction floor plan.
2. Millimeter dimensions are in [].
3. All dimensions are +/- 1/2".
4. Utility connections will vary depending on the ironer. Consult factory for location specific to your equipment.

NOTE:

Consult factory for pricing, availability, height and floorspace requirements for addition to existing ironers.

Features

- Enables one person to efficiently operate a complete finishing system – including feeding, ironing, folding and stacking sheets or large table linen
- Ideal when built into a new Chicago Tri-Star Ironer/ Folder or Chicago Imperial Series Ironer
- Can also be loaded alternately by two people for increased production at higher speeds
- Slim design fits in almost any laundry – this built-in model adds less than 40" (1000 mm) to the front-to-rear floorspace required for an ironer or ironer/folder
- Operators have a clear view of spread items for stain/tear quality control
- **CHI** microprocessor control of all functions
- Processes king, queen, double or single sheets, as well as table linen larger than 54", by lifting large items above floor level for improved spreading and free suspension of linen off floor
- Above-ironer design raises out of the way pneumatically to allow small pieces to be fed directly onto the ironer's feedboard and does not interfere with ironer's return-to-front operator function
- Microprocessor-controlled spreading by timing belt with linen laydown by air pulse
- Variable speed range up to 110 FPM
- Exclusive air foil laydown for top quality finished linen

A Complete Range of Separating, Feeding, Ironing, Folding, and Sorting Options

Because CHICAGO specializes only in flatwork finishing equipment, it can offer the world's widest range of high production separating, feeding, ironing, folding, and sorting equipment. Complete flatwork finishing systems range from automated multi-roll systems producing over 2000 pounds per hour to compact ironers for small on-premise laundries.

Chicago's performance record is unmatched in thousands of installations in commercial, textile rental, institutional,

and on-premise laundries. An experienced Chicago professional will be pleased to make an objective equipment recommendation based on your production, space, utility, and budget requirements.

Contact your local Chicago distributor or the factory sales assistance office for a no-obligation analysis of your needs.
