

Laser+ Series

Mid-Range Flatwork Ironers With Advanced Linen Handling

CHICAGO®

THE STANDARD IN IRONING PERFORMANCE, PLUS...

Customized to produce the highest quality finished linen and provide the excellence in presentation your premium customer expects. It is based on the same performance and efficiency principles of Chicago's original Power Production Series. Enhanced control provides the kind of flexibility operators appreciate so they can efficiently and consistently produce precision finishing over a widespread variety of cotton, blended, polyester and other specialty fabrics and high-end linen.

Gas, steam and electrically heated models available in a choice of 16" (400mm), 20" (500mm) and 24" (600mm) diameter heated rolls, in a choice of widths.

FEATURES

Optional Laser Guided Lane Markers

Bright visual guides give operators the edge they need for accurate and consistent lane management when processing small pieces across multiple lanes.

VacFeed Extended Input Conveyor

A powerful built-in vacuum system facilitates top quality leading and trailing edges with less operator effort. Perforated ribbons secure the leading edge and hold the piece in position throughout the entire process, ensuring a clean trailing edge. The result is a neatly fed piece properly presented to the ironer for the highest quality finish.

Foot Pedal Pause

Allows operators to momentarily pause the input conveyor, providing extra time when needed to straighten a leading edge, position a large banquet round, or inspect an item for quality assurance. This ensures the ideal feed for even the most demanding linen—all without stopping the rest of the ironer as it continues to process the previous piece.

Clearvue Inspection Lights

Clearvue linen inspection light bridge provides high quality, energy efficient lighting for operator inspection of fed pieces.

Visit Chicago's website www.chidry.com for easy access to the latest floorplans, technical specifications, etc.

A Complete Range of Separating, Feeding, Ironing, Folding, and Sorting Options

Because Chicago specializes only in flatwork finishing equipment, it can offer the world's widest range of high production separating, feeding, ironing, folding and sorting equipment. Complete flatwork finishing systems range from automated multi-roll systems producing over 2000 pounds per hour, to compact ironers for small on-premise laundries.

Chicago's performance record is unmatched in tens of thousands of installations in commercial, hospitality, health care, textile rental, and institutional laundries. An experienced Chicago professional will be pleased to make an objective equipment recommendation based on your production,

space, utility and budget requirements. All equipment is designed and built in Chicago for complete quality control and prompt service and parts availability, including overnight delivery if necessary.

Contact your local Chicago distributor or the factory sales assistance office for a no-obligation analysis of your needs. Visit our newly redesigned and now mobile-friendly website www.chidry.com for easy access to current product brochures, detailed floor plans, and specifications, as well as videos of select Chicago products in action.
